

SPARTAN
GO LIVE 2

INFORMATION

SPARTAN GoLive 2 4G/LTE [CLOUD Only] - BLACK FLASH (Camo) + built-in viewer

The Spartan GoLive 2 4G/LTE CLOUD camera trap features a new, Wide-angle lens with a 96° FOV and industry-leading LIVE STREAMING. Our compact, nature-resistant design has simplified switches & control buttons, a front-facing LCD screen, and a built-in metal pitch-angle bracket to make it easier than ever to deploy your trail camera in the field. Maintain your setup with a removable cartridge-style battery tray and the option to use external power. Once deployed, you will be able to live stream up to 30 frames per second, quickly retrieve HD photos and videos, and update your camera remotely through our Spartan Camera Management App.

The Spartan GoLive 2 live streaming cellular camera trap gives the user the ability to view in near real-time from a remote location over a cellular data connection. This feature combined with the motion detection makes the GoLive 2 camera from Spartan Camera the ultimate scouting tool or security camera for your home, property, hunt club, construction jobsite security or business.

The GoLive 2 does not replace the GoLive 1 but instead offers a smaller case design as well as a much wider field of view. The wider FOV and live stream ability gives it an advantage when trying to cover a wider area making it the perfect choice for food plots, duck ponds, property security and construction jobsite security. Add a solar panel to keep the built in battery charged and keep it out continuously. External power is connected through DC port on the bottom of the camera, but it does not have the screw on connection that the GoLive 1 has. Spartan GoLive Battery Boxes come with an adapter. This camera also shares the innovative hinged metal mount on the back so that you can adjust the angle of the camera down when using the mounting strap allowing you to aim it correctly. Using the "view" feature from the the menu you can fine tune the aim of the camera while viewing what the camera sees in the view screen on the camera. These are features also found on the Spartan Lumen and Spartan Eclipse NON cellular cameras.

Features include;

SPARTAN GO LIVE 2

Spartancamera.com
