

INFORMATION

SG 2060-K / SG 2060-X

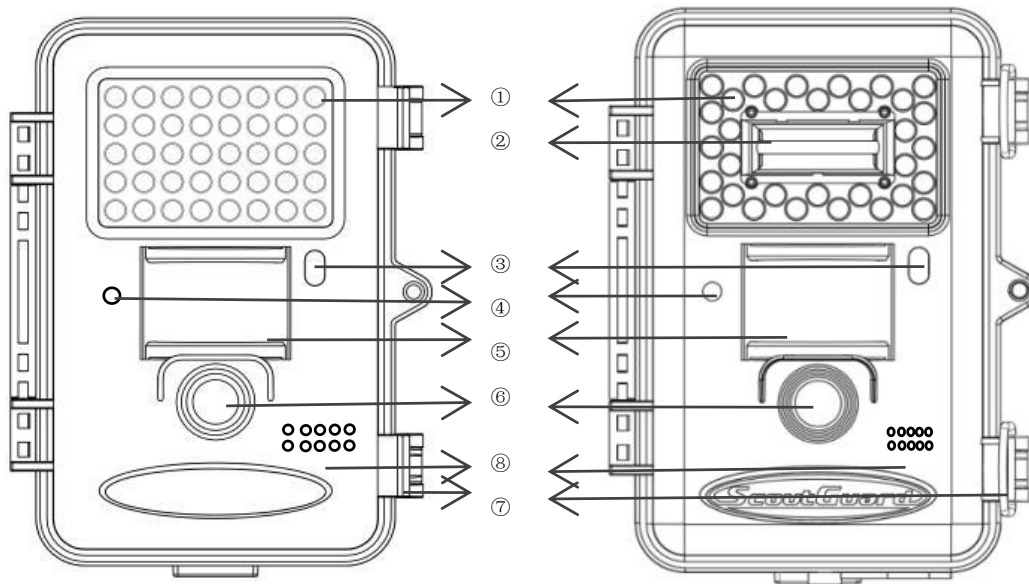

SG2060 series cameras are ultra HD long range high end trail cameras.

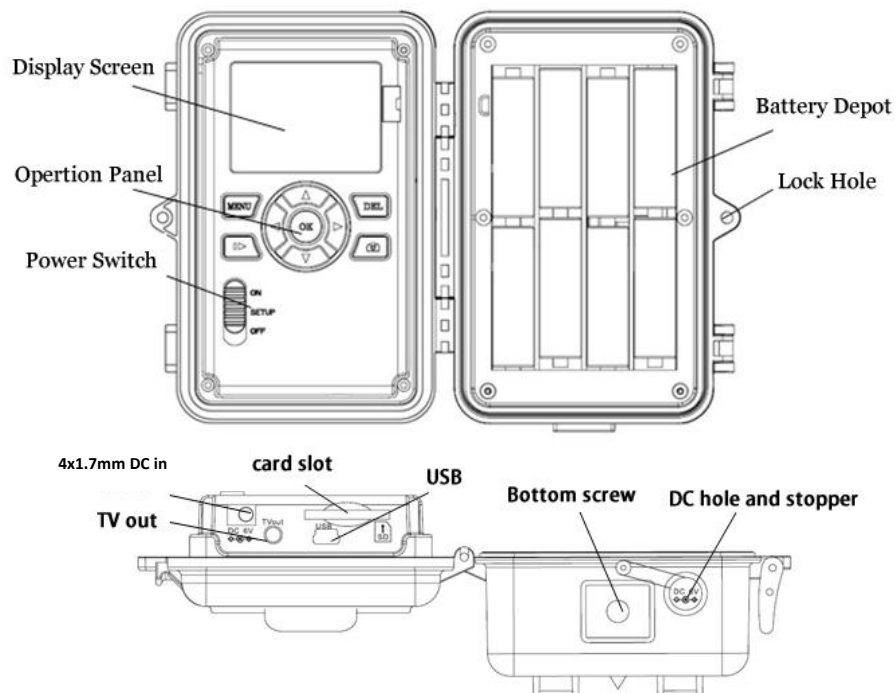

SG2060-X not only has an extra long detection range with invisible IR flash, but also comes equipped with a built-in Xenon flash light which greatly reduces 'motion blur' for better night photos.

With their 25MP image resolution and 1080p video high definition these cameras present vivid scenes.

SG2060 series use 940nm NO GLOW invisible IR flash that cannot to be seen at night - so no disturbance. 8 or 4 pieces of AA batteries are used in these cameras which can be used in rain and snow.
