

INFORMATION

MG984G-30M

From the most reliable and respected trail camera makers of ScoutGuard ... with incredible transmission SPEED of sending photos and videos on 4G NETWORKS (if no 4G signal the unit will still operate on 3G and / or 2G).

MG984G-30M: It transmits pictures instantly to your mobile device and videos (less than 10 Megabytes) to your e-mail via GPRS network.

- High-end 2-way communications and 1080P Full HD videos with sound

PLEASE NOTE: This 2018 model has been tested by the ScoutGuard manufacturer (Bolymedia) and by our SA Technicians and the camera has been upgraded with the latest G-Module mobile modem - G-Module cameras are far superior in performance than previous models with the e-Module

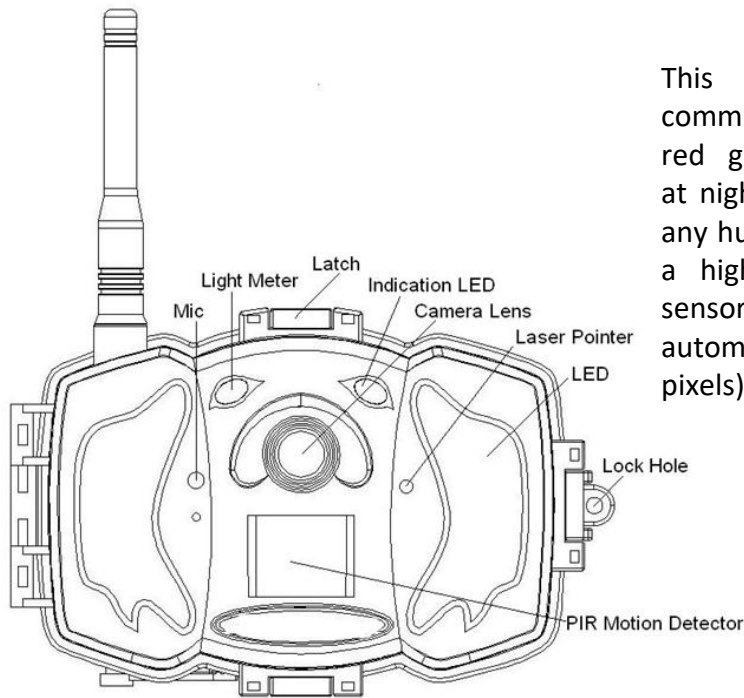

This camera is the ultimate when it comes to two-way SMS messaging communication (MMS/SMS/GPRS). Multifaceted in its build, it boasts remote SMS control, 1080P Full HD video resolution, Black Zero-Glow infrared technology, sound broadcast, built in 3" inch colour LCD display, real time sound transmission and so much more.

You can even turn ON/OFF the unit using your mobile remotely, take "on the spot pictures".

Any of these commands can easily be completed by your mobile - anywhere in the World.

All it takes is a simple SMS or you can download (for free), the ScoutGuard iPhone or Android app to achieve the same outcome.

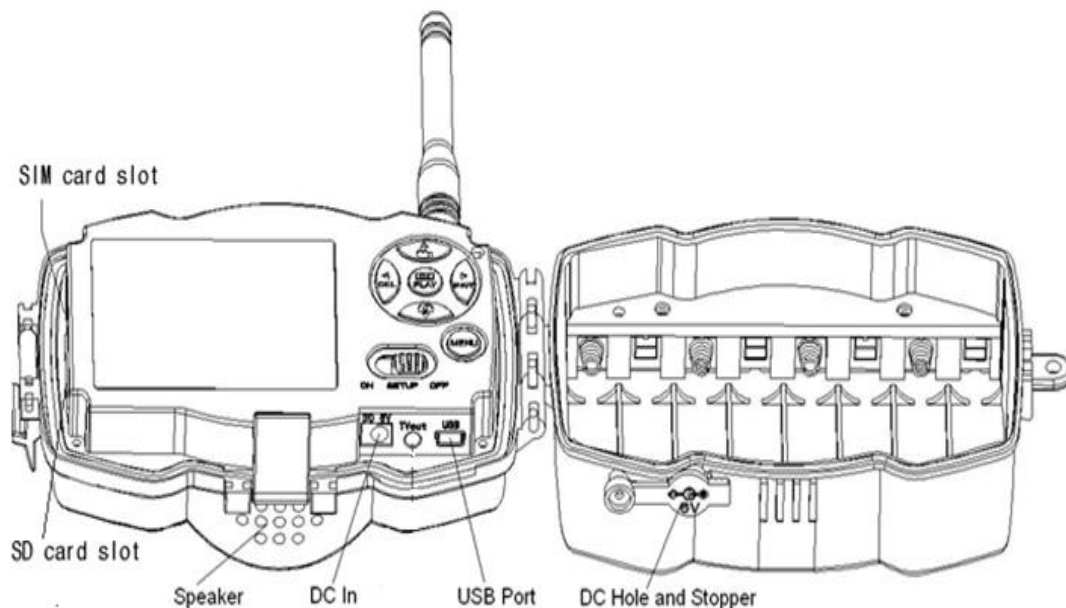

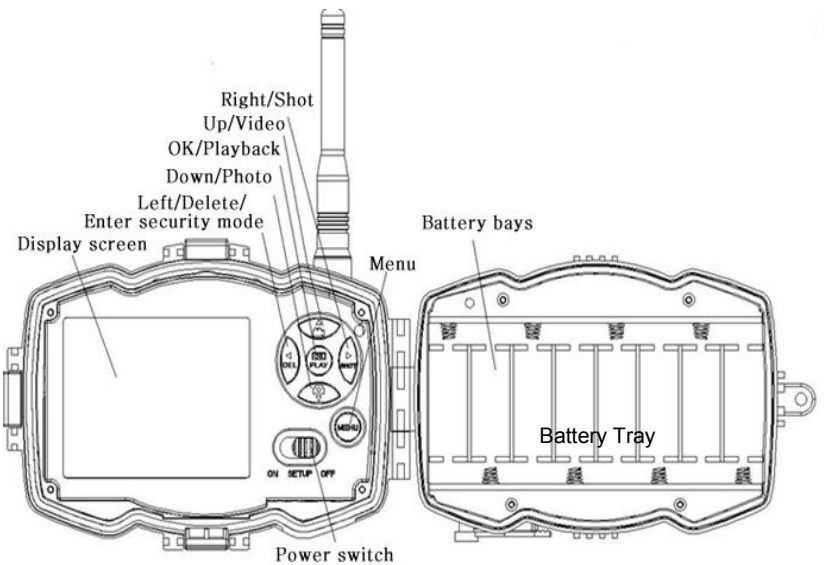

Please note: This certified 4G model runs on the LTE/4G/3G/2G network in South Africa.

This camera, a digital scouting camera with communication function, is a digital, black flash (no red glow from the flash emitters when activated at night) surveillance camera that can be triggered by any human or animal movement and is monitored by a highly sensitive Passive Infrared (PIR) motion sensor. After being triggered, the camera then automatically captures high quality pictures (up to 30M pixels) or records video clips (1080 FHD).

MG984G-30M: This model instantly transmits pictures or videos (less than 10M) to your mobile device / to your e-mail via your chosen GPRS network.

You will only be alerted when the camera is triggered - unless otherwise set per custom settings. It takes color pictures or videos during the day with sufficient daylight. While at night, the built-in black flash LEDs can take clear night pictures or videos (these will be in black & white).

Features:

- 30MP CMOS sensor
- 1080p HD video resolution
- Game call broadcasting
- Real time picture messaging to your phone
- Send pictures to your phone or e-mail through SMS/GPRS signal
- Both MMS and GPRS support, compatible with 4G GSM network
- Stores images on up to a 32GB SD card
- Long detection range of up to 100ft
- Built-in 3" color LCD display
- Water resistant to help the camera function in any environment
- Picture or video settings
- True 940nm no glow IR LEDs lighting of up to 80 ft
- 2-way communications to your mobile phone
- No-glow infrared illumination
- Supports solar and external power

Specifications:

- Image Sensor: 14MP color CMOS, 20MP/30MP interpolation
- Lens: F/NO=2.2
- Field of View: 57°
- PIR Detection Range: 30m (100ft)
- Display Screen: 3" LCD
- Video Resolution: 1080p / 720p HD, VGA (640x480)
- Photo Resolution: 30MP (6400x4800), 20MP (5184x3888), 14MP (4320x3240)
- PIR Sensitivity: adjustable (high, normal, low, off)
- Trigger Time: 0.8 sec.
- Operation/Storage Temperature: -20 - +60°C / -30 - +70°C
- PIR Interval: 0 sec. – 60 min.
- Video Length: 5–180 sec.
- Power Supply: 8xAA or 4xAA
- Stand-by Current: < 0.25 mA (<6mAh / day)
- Dimensions: 147 x 96 x 79 mm
- Storage: Up to 32GB SD card
- Night Vision Recording: No glow
- Weight: 0.30 kg

Includes:

- USB cable
- Tree strap
- Tree screw mount
- User manual
- Antenna
- Warranty card

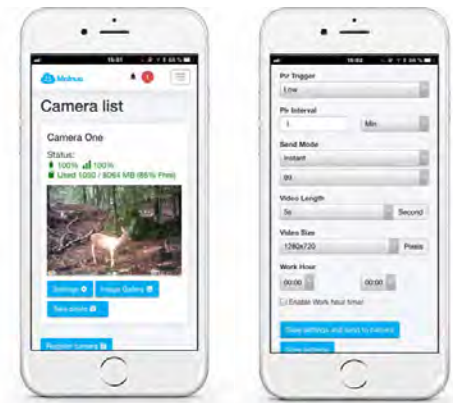

4 x sending options:

1. Molnus (default setting) - (Videos will be sent that are less than 10MP) - *Cloud service (details below)*
2. Phone MMS
3. Email MMS
4. Email GPRS (Videos will be sent that are less than 10MP)

Send your photos and videos directly to the Molnus cloud

- ✓ **No Monthly Hosting fees**
- ✓ Get 300 credits when you register a camera! Credits are only used when remotely changing /checking camera parameters on Molnus.
- ✓ No difficult SMTP and email settings.
- ✓ No SPAM filter issues.
- ✓ No long delays on notifications.
- ✓ No more searching email inboxes for photos.
- ✓ No more Junk mail warnings.
- ✓ No waiting for images.
- ✓ Control all your camera settings directly from Molnus.
- ✓ Control your camera from web browser or mobile App.
- ✓ Secure upload and cloud storage.
- ✓ Push notification to both browser and app.
- ✓ Photo gallery for easy management of photos.
- ✓ Embedded video player allows you to watch videos directly in application or browser.
- ✓ Total control over your camera
- ✓ Access settings from anywhere
- ✓ Enable SMS Control
- ✓ Set work hours
