

INVISIBLE AGRESSOR WITH NO-GLOW BLACK-LEDS.

TRAIL CAMERAS

TROPHY™ CAM HD NO-GLOW

New Pre-set menu choices based on location and illuminated 5-way button control panel make these units the best Trophy Cam ever. Field-proven design with a removable "ARD" anti-reflection LED cover, strengthened cable lock channel and an improved latch for maximum ruggedness. These No-Glow models feature black LEDs that are invisible to both game and other hunters. These models provide stunning images with a super-fast 0.2-second trigger speed, hyper 0.5s recovery rate, extended nighttime photo range and true 1-year battery life. The New Trophy Cam HD No Glows are exactly what hunters have been waiting for.

All Trophy Cam HD are capable of capturing 1080p HD video - with sound - for a brilliant connection to the game you hunt. NEW : Dynamic Video uses the duration of PIR activity to determine the length of the captured file (up to 2min in daytime, up to 1 min in night time with LED on Low or Medium and up to 15 sec at night with LED on High).

A quantum leap in distance and brightness, this new system ensures the sharpest after-dark imagery.

Automatically snaps images at preset intervals of 1 minute to 1 hour, with 2 time slots to monitor dusk and dawn movement.

Hyper fast recovery allows camera to capture an image and arm itself again in less than 1 second.

All Trophy Cams have the option to automatically embed GPS coordinates to make tracking game movement and camera placement simple.
