Firmware Update Instructions - MAY 2019

How-to guideline for the installation of the firmware

Here is how – if the relevant **Cdy_1_0_0.zip** file has been downloaded or sent to you via e-mail:

1. Copy the **entire Cdy_1_0_0.zip** file straight onto a freshly formatted SD card (do not just extract and copy the **.fw** files that are located inside this Cdy_1_0_0.zip file)
2. Insert the SD card back into the camera trap
3. (**For C / E Series cameras**) - Press MODE until COMMANDS is displayed. Press MORE until **LOAD F/W** is displayed. Press UP twice to install.
4. (**For F, F-Pro Series cameras**) - Insert the SD card into your Cuddeback camera. Press 'A' until **LoAD** is displayed. Press 'B' to load the firmware.
5. PLEASE NOTE - battery level must be 50% or greater for firmware to load
(*please do not try to open the .fw files on your computer as they will not be able to read them*)

If you have questions on this, or the products themselves, or if you need other assistance for want to place an order, please feel free to contact us.

Kind Regards

Chris & Nicola Pearson
