

Browning Trail Cameras: Dark Ops HD Pro

The Dark Ops HD Pro camera is the newest addition to the best-selling, smallest high-performance no-glow trail camera line in the hunting industry. The Dark Ops HD Pro cameras feature an incredible 0.3 second trigger speed and .5 second recovery time and users will enjoy the remarkable high-end performance and 18MP picture quality along with a new video processor that produces incredible quality 1280 x 720 HD video clips with sound.

The Dark Ops HD Pro game camera also takes nighttime pictures using Browning Trail Camera's innovative adjustable IR flash technology which gives users the flexibility to set the camera in a Power Save mode or extend the no-glow illumination to an amazing range of 80-feet at night. Additional features include a Smart IR video detection system, which allows the camera to continue recording video footage for up to 5 minutes during the daytime and up to 20 seconds at night as long as the game continues to move in front of the camera, and an SD card "memory management" option that allows users to simply overwrite older images on the SD if the memory is full. And as if all of that were not enough, the Dark Ops HD Pro is able to work with 512 GB SDXC memory cards and has an impressive 1.5" color viewing screen.

Model #**BTC-6HD-P**

Key Features:

- 18MP Camera
- Compact Case Size (4" x 3.25" x 2.25")
- 1280 x 720 HD videos with sound
- Daytime Videos Range from 5 Seconds - 2 Minutes in Length;
