

Browning Trail Cameras - Recon Force FHD Extreme

The Recon Force Extreme FHD series camera features an 80-ft detection range, and adjustable IR flash modes for optimum picture control at night. Another great feature is the built-in 2-inch color display to preview exactly where your camera is aimed in the field as well as check your images from your camera. The Recon Force Extreme FHD camera also features high quality 20MP images and 1920 x 1080 Full HD video with sound. And the video is so amazing that you can play back the video clips on a 60-inch TV without losing any video clarity. For superior performance after the sun goes down, the Recon Force camera uses an infrared flash that will illuminate the wildlife in your pictures and videos out to 120-feet and the "Zero Blur" technology captures images at night using the fastest shutters to eliminate motion blur in your nighttime images. Additional features include a Smart IR video detection system, which allows the camera to continue recording video footage for up to 5 minutes during the daytime and up to 20 seconds at night as long as the game continues to move in front of the camera, and an SD card "memory management" option that allows users to simply overwrite older images on the SD if the memory is full. Also, new for the 2017 the Recon Force Extreme FHD is it's unprecedented compatibility with 512 GB SDXC memory cards.

Model #: **BTC-7FHD-PX**

Key Features:

- 20MP Camera
- 2" Color Viewing Screen
- Infrared LED Illumination at Night
- Adjustable IR Flash (Power Save, Long Range, Fast Motion)
- 1920 x 1080 Full HD videos with sound (Daytime Settings Range from 5 Seconds - 2 Minutes)
