SPARTAN
CAMERA

SPARTAN GoCam 4G – Remote Controlling your camera trap using SMS:
(PLEASE NOTE: SOME CELLULAR TOWERS DO NOT SUPPORT ALL COMMANDS. If the unit sends you a text response of "Network Busy" this means the tower/service area does not support the command. This is not a manufacturer/camera issue).
The Spartan® GoCam 4G camera can be controlled by sending SMS commands to the camera's SIM card phone number.
The Admin Phone Number - The Recipient **Phone1** will be the commander phone numbers i.e. the one that can control the camera remotely via SMS commands.
Power Saving - In order to use the SMS remote control function, the user needs to set the switch to **OFF** in the setup process.
Status Response (SMS) - In order to use the SMS control function, the user needs to tick this box in the setup process
If checked, the camera will send The Commander Phone Number (Phone1) a return SMS confirming the command **- whether sending via MMS or Email** *(User must have a valid cell phone number input for Phone1 for this function to operate).*

Spartan® GoCam 4G SMS Command Code List

COMMAND	TEXT MESSAGE	SMS RESPONSE YOU WILL GET	
Take Photo / Video and Send Now	*500#	*Picture / Video sending*	
Get Basic Camera Information	*160#	*Signal: (out of 5), Battery: (out of 5), SD total: (MB size of card), remain: (MB left on card)*	
Camera Status Report:	*501#	*Status report sent (Cam name / IMEI / Voltage / Signal / Battery / SD / Temp / FW version)*	
Send Via MMS	*120#0#	*Send via MMS*	
Send via Email (Internet)	*120#1#	*Send via Internet (When send via is Internet, "Send To" will be modified to Email only)*
