

Browning Trail Cameras: Dark Ops Full HD EXTREME

The Dark Ops Full HD Extreme sub-micro camera trap continues to expand the feature set on the industry’s most popular Black Flash (no glow) camera series. By adding a 55-degree FOV to the camera and HDR night photos to the invisible “Radiant 4” LED system, users will experience night-time images and videos like never before. So, whether the goal is to get a look at those camera shy subjects you’ve been after or to keep an eye on your things while you are away, this is the camera for the discerning camera trap user.

With that said, there are other popular features available on the Dark Ops Full HD Extreme camera trap that will further enhance the user’s experience beyond the night-time imagery. For example, the adjustable trigger speeds offer users the chance to customize their experience based on their personal preferences. Throw in other features like 24 MP image capability, 1080p Full HD video capability, a unique SD Card Management feature, a Smart IR Video setting, and Browning’s industry defining battery life, and the Dark Ops Full HD Extreme camera trap is equipped to provide the most complete trail camera experience in the market for just the right price.

Model Number: BTC-6FHDX

Camera Features:
